REFERENCES

Provided on request.

EXPERIENCE

- **Junior Engine Engineer, Star Stable Entertainment** 2026/01 - now

  Stellar / Star Stable Engine & C++

  - Working on the in-house scripting language, shipped and developed a component-system for the engine.

- **Engine Engineer Intern, Star Stable Entertainment** 2025/05 - 2025/12

  Stellar / Star Stable Engine & C++

  - Worked closely with other programmers in development of the in house game engine and its architecture.

- **Programmer TENSTACK,** Little Wings Deliveries 2025/01 - 2025/03

  Unity & C#

  - Contract worker and core programmer on the team developing gameplay features, and focusing on improving the performance and architecture of the project.

- **Collision Designer Hazelight,** Split Fiction

  Unreal Engine 5 2024/09- 2024/12

  - As a contractor on this project, I focused on completing UE5 tickets related specifically to volume and collision adjustments provided by QA, ensuring a smooth and consistent gameplay experience for players.

PROJECTS

- **Programmer,** Boom'n'Rang 2024/11 - 2024/12

  SDL2 & C++

  - Developed gameplay features such as the Boomerang weapon and Enemy AI.
  - Created a level editor utilizing ImGUI.

- **Programmer,** $(xyz)^0$ 2024/08 - 2024/12

  OpenGL & C++

  - Developed core gameplay features such as FPS Character Controller, Enemy AI and UI using C++ and ImGui.
  - Implemented a particle system and trails.

- **Gameplay Programmer,** Reberryon 2024/03 - 2024/06

  Unreal Engine 5 & C++

  - Developed a "Parabolic Curve" based throwing system in UE5 C++.
  - Developed a Key to Door system using a blend of C++ and Blueprints for animations.
  - Handled communication between programmers and other disciplines ensuring smooth collaboration and thorough documentation throughout the development cycle.

EDUCATION

FutureGames

09/2023 - 12/2025 - Stockholm

- Higher Vocational Education - Game Programmer
